

`/usr/include/opencv2
/flann/heap.h`

```
graph TD; A["/usr/include/opencv2  
/flann/heap.h"] --> B[algorithm]; A --> C[vector];
```

The diagram illustrates the inclusion of standard C++ headers within the OpenCV 2.0 FLANN module. A central gray box at the top contains the file path `/usr/include/opencv2/flann/heap.h`. Two blue arrows originate from the bottom of this box, pointing downwards to two separate white boxes. The left box is labeled `algorithm` and the right box is labeled `vector`, indicating that these headers are included by the `heap.h` file.

`algorithm`

`vector`
